

Price Group Report

The *Price Group Report* screen lets you generate a report showing all price groups maintained in BMW.

Go To: Common → Common Reports → Price Group Report.

Click on the *Price Group Report* option to open the *Price Group Report* window. On the *Price Group Report* window, filtering parameters can be used to define the scope for processing the report.

The screenshot shows the 'Price Group Report' window within the BATCHMASTER PAINT application. The left sidebar contains a navigation menu with options: Dashboard, Common, Inventory, Purchase, Quality Control, Sales, Accounts Payable, Accounts Receivable, General Ledger, Bank/Cash, R and D, BOM, Production, and Costing. The main area of the window is titled 'Price Group Report' and contains three input fields: 'Parameter' (with a dropdown arrow), 'Price Group From' (with a dropdown arrow and a 'Q' icon), and 'Price Group To' (with a dropdown arrow and a 'Q' icon). The 'Price Group From' field is set to 'A' and the 'Price Group To' field is set to 'C'. To the right of these fields are labels 'HIGH' and 'LOW' respectively. At the bottom right of the window, there are two buttons: 'Process' and 'Close'.

Generating a Price Group Report

1. Specify the name in the *Parameter* field to save the selected Range into a database so that it can be fetched again later. Next time to print the report, you can select the saved parameter using the dropdown next to the field.
2. Use the lookups next to the *Price Group From* and *To* fields to select the lower and upper limits, respectively, of the range of price groups to be displayed in the report.
3. Click the *Process* button to generate the report.

An example of a generated *Price Group Report* is shown below.

Price Group Report
